Introduction

a jump'n'shoot riddle game

After the Hero's attack, it's your duty to...

activate all robots!

Every 'activation-shoot' reduces points. Every activated robot, machine or trap adds points. Getting hit removes points. If the player has only *one point left* he gets warned that only one *ONE* shoot is left ...

>... *GAME OVER!*

... AND ATFTER THAT,HE HAS NEGATIVE SCORE

Figure 1: His name is mini

Levels, Robots, and more

In this Section it's all about the levels the robots and more.

Level 0 - The Start/Menu level

Most games don't have a playable menu screen level. What is a playable menu screen level, you ask? Good question, very good question indeed.

What is a menu screen?

Before a person can start a game he usually can select on the menu screen what he wants to do. The menu screen usually contains a list of selectable items:

- Start
- Options
- *(something something)*

On this menu screen the controls are usually different than the controls in the game.

Up and down on a joy-pad, joystick or on a keyboard (sometimes “w” for up and “s” for down) toggle between the menu items. With one button on the joy-pad, joystick or keyboard (sometime space or enter) the user select what he wants to do.

In this game the menu is a playable level. Why? So the user uses the actual controls of the game and not some extra controls for the menu. So he can learn the controls for the game early.

Level 0 teaches the player how to play the game, and presents him the first robot to activate.

But first let us take a look at the elements of the first level:

Project goals

No project is ever done if there are no goals set. To know when the Version 1.0.0 is done of this game, some goals are set.

Some of these goals will be hard set goals, like the number of different levels, robots, boss robots and such. Some goals will be soft, like graphics, sound, all the look and feel.

Levels

A Minimum of 5 levels. Every Level has 5 Stages.

Level Zero is the playable menu level.

Level Structure

Each level exist of 5 stages. Each level has one theme and one kind of robot. 4 stages of one level introduce one new robot, the 5th stage is the Endgengner stage. Each level introduces a new kind of robot, each stage introduces a new version of the robot.
