Introduction

 $a\ jump\ 'n'shoot\ riddle\ game$

After the Hero's attack, it's your duty to...

activate all robots!

Every 'activation-shoot' reduces points. Every activated robot, machine or trap adds points. Getting hit removes points. If the player has only *one* point left he gets warned that only one ONE shoot is left ...

> ... GAME OVER!

... AND ATFTER THAT, HE HAS NEGATIVE SCORE

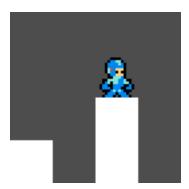

Figure 1: His name is mini

Levels, Robots, and more

In this Section it's all about the levels the robots and more.

Level 0 - The Start/Menu level

Most games don't have a playable menu screen level. What is a playable menu screen level, you ask? Good question, very good question indeed.

What is a menu screen?

Before a person can start a game he usually can selects on the menu screen what he wants to do. The menu screen usually cointains a list of selectable items:

- Start
- Options
- (something something)

On this menue screen the controls are usually different than the controls in the game.

Up and down on a joy-pad, joystick or on a keyboard (sometimes "w" for up and "s" for down) toggle between the menu items. With one button on the joy-pad, joystick or keyboard (sometime space or enter) the user select what he wants to do.

In this game the menu is a playable level. Why? So the user uses the actual controls of the game and not some extra controls for the menu. So he can learn the controls for the game early.

Level 0 teaches the player how to play the game, and presents him the first robot to activate.

But first let us take a look at the elements of the first level:

Figure 2: The Title

Project goals

No project is ever done if there are no goals set. To know when the Version 1.0.0 is done of this game, some goals are set.

Some of this gaols will be hard set goals, like the number of different levels, robots, boss robots and such. Some goals will be soft, like graphics, sound, all the look and feel.

Levels

A Minimum of 5 levels. Every Level has 5 Stages.

Level Zero is the playable menu level.

Level Structure

Each level exist of 5 stages. Each level has one theme and one kind of robot. 4 stages of one level introduce one new robot, the 5th stage is the Endgengner stage. Each level introduces a new kind of robot, each stage introduces a new version of the robot.

Robots

Start Level (00)

- Start Robot
 - the Start Robot has to be activated
 - if activated it falls down
- Exit Robot
 - the exit robot appears if (all) the robots are activated
 - has to be activated also to leave the room
- Reset Robot
 - $\bullet\,$ can be activated if to many activation shoots where used to leave level 0-0
 - resets the points to seven
 - resets the start robot and the exit robot also.

- Continue Robot
 - appears if the level 1-0 to 1-4 are mastered
 - can be activated to continue the last played level
- Start Boss Robot
 - a hidden level? and a hidden boss?
 - sleeping tiger hidden dragon

Jump Level (01)

- Jump Robot
 - \boxtimes starts jumping when activated
 - \boxtimes helps get higher grounds
 - \boxtimes blocks passages sometimes
 - \boxtimes open passages by jumping away
